European Speed Skating Championships

Until 1907 only a winner was declared, if winning at least two distances of the four ones (until 1895 three distances). If not, no winner was declared. 1908 - 1925 ranking points (1 point for winning the distance, 2 points for the runners-up and so on) were awarded. 1926 and 1927 the raking points were calculated by the skater's time and the world record (in %). The rule being the European Champions by winning at least three distances was still in use until 1986.

Since 2018 the European Championships are over single distances in the even years, or all-round and sprint in the odd years.
